## **What's Inside**

Ascend into a higher money frequency by removing abundance blocks so that you are living in your royal money blueprint now.

We've all been programmed with lack and scarcity. These programs prevent us from attracting more money into our lives or leaves us feeling stuck, creating the same money issues month after month.

Many try to rely on affirmations or law of attraction techniques to manifest more money only to keep seeing lack show up in their lives.

This is because money programs are deeply connected to our self worth. We are programmed with deep negative beliefs around our self worth and money and these programs are difficult to heal.

In this meditation, you will learn how to reprogram your mind for a healthy relationship with your divine power, open yourself to harmonious divine compensation, and attract the opportunities and situations that helps you manifest more money in your life.

It's time for you to ascend into your sovereign state, where you live with royal money mindset blueprint and manifest divine money in your life.

## **Instructions**

This is a 34-minute MP3 audio track. Listen with headphones 2x per day to optimize your results. Ideal listening time, just before sleep and right after waking.

This audio track is recorded with binaural beats: Theta 417hz + 639hz for deep meditation allowing your mind to harmonize to receive the subliminal messages for deeper alignment and results. Do not listen while driving or operating machinery.

Brain wave technology allows your subconscious mind to be in a receptive state so that you can clear limiting beliefs and blocks at the deepest levels.

As you continue to commit to changing your internal blueprints, overtime, you may feel empowered, stronger, joy, more peaceful, have a better outlook and begin to manifest the situations and circumstances you desire in your physical reality.

Your core frequency acts like an antenna that brings in it's corresponding vibration. This manifesting with our physical reality is when our core internal frequency changes to bring to us it's corresponding vibration connected to our ideal situations, circumstances, people or individual.

STEP 1: Get in a comfortable relaxed position.

Listen with headphones 2x per day minimum. Listen more if you have more time. Best times to listen is just before going to bed and upon waking up.

**STEP 2: Do not listen while driving or operating machinery**
